Dicky Maulana

Software Engineer | FullStack Developer | System Engineer, Mobile
Application & Website
Jakarta, Indonesia

Summary

Hi everyone!

My name is Dicky Maulana, and I am a passionate Software Engineer with a strong interest in full stack development. Over the years, I have gained solid experience in both frontend and backend development, and I continuously strive to improve my skills by exploring new technologies and best practices.

In the frontend field, I specialize in using ReactJS, React Native, and VueJS to create interactive and responsive user interfaces. I have a good grasp of HTML, CSS, and JavaScript, allowing me to design attractive, user-friendly layouts that enhance user experience. I believe that leveraging these frameworks enables me to develop engaging applications that meet modern usability standards.

On the backend, I am experienced with Express.js, ORM, Sequelize, and working with PostgreSQL databases. I have built secure, scalable APIs using Express, and I am familiar with database modeling and optimization with Sequelize. My goal is to develop robust server-side solutions that seamlessly integrate with frontend interfaces.

In addition, I am proficient in version control systems like GitHub, and I excel in collaborative environments, valuing clear communication and teamwork. I always seek opportunities to learn new technologies and improve my technical skills, believing that continuous learning is key to growth as a developer.

I am excited to bring my skills and passion to a dynamic team, contributing to the creation of innovative software solutions. If you have any questions or would like to connect further, please feel free to reach out. Thank you!

Experience

Motor Sights International

Full Stack Developer

December 2025 - Present (10 months)

Jakarta, Indonesia

1. Architect & Plan Systems: Conceptualize and design end-to-end application architectures for upcoming development projects.
2. Requirement Analysis: Lead technical discussions with the team to define and refine complex system requirements.
3. Cross-Departmental Collaboration: Actively engage in cross-functional meetings and brainstorming sessions across all project stages to ensure seamless alignment and delivery.
4. TDD & Analytical Support: Partner closely with the System Analyst team to develop comprehensive Technical Design Documents (TDD) and project blueprints.
5. Strategic Problem-Solving: Contribute diverse insights and proactive ideas during project discussions to optimize workflows and resolve technical bottlenecks.
6. Infrastructure & DevOps: Manage server maintenance and execute semi-DevOps deployments across Development, Staging, and Production environments.

KJPP Karmanto dan Rekan (K-Appraisal)

Full Stack Developer

September 2025 - December 2025 (4 months)

Jakarta, Indonesia

1. Implement legacy systems into modern digital workflows with a full-stack approach.
2. Design, develop, and present end-user web applications End-to-End (E2E).
3. Enhance full-stack capabilities through ongoing training in modern frontend/backend technologies and soft skills.
4. Architect and build scalable web applications (frontend + backend + database).
5. Deepen expertise in .NET ecosystem and C# for back-end services and API development.

BEONE SOLUTION - PT BEONE OPTIMA SOLUSI

Full Stack Developer

September 2023 - August 2025 (2 years)

Indonesia

1. Developed a mobile application that functions as an electronic invoice, enabling efficient billing and payment processes.
2. Designed and implemented a robust system architecture based on microservices, ensuring scalability, reliability, and maintainability for high-traffic environments.
3. Integrated a payment gateway system, facilitating secure and seamless payment transactions for users.
4. Optimized backend services to handle real-time data processing and ensure high availability.
5. Collaborated with cross-functional teams to design and implement RESTful APIs for smooth communication between frontend and backend systems.
6. Developed a user-friendly frontend interface using modern frameworks and tools, ensuring optimal performance and accessibility.
7. Conducted performance testing and fine-tuned system components to handle high concurrency.
8. Maintained comprehensive documentation for system architecture, processes, and workflows to support ongoing development and maintenance efforts.
9. Gained experience in interfacing and integrating data between different systems, such as connecting SAP systems with DJP (Direktorat Jenderal Pajak), involving automated data exchange and synchronization for accurate tax reporting and compliance

Cerberus Technology Solutions
Full Stack Engineer
July 2023 - August 2023 (2 months)
Jakarta, Indonesia

Sagara Technology
Back End Engineer
November 2022 - February 2023 (4 months)
Jakarta, Indonesia

1. Develop the HRIS project that was previously created by adding several HRIS project features
2. Present the features developed to the user and connect the server and client

PT Reycom Document Solusi
8 months
RPA Developer

December 2021 - May 2022 (6 months)

Jakarta, Indonesia

1. Develop a BOT using an automation language anywhere according to the needs of the company
2. Perform maintenance and perform trouble fixing to keep the BOT running

Data Entry Specialist

October 2021 - December 2021 (3 months)

Jakarta, Indonesia

1. Retrieving and importing data to be entered into the company's database server
2. Work according to the target to input daily data

Kiki Tech PTE. LTD

Ambassador

January 2021 - August 2021 (8 months)

Jakarta, Indonesia

1. Promote the company to many people and do branding on the products sold at the company

PT. Astra International Tbk - Daihatsu Sales Operation (Astra Daihatsu)

Mechanical Engineer

January 2017 - March 2017 (3 months)

Jakarta, Indonesia

1. Check the vehicle regularly so that the vehicle remains in good condition
2. check the damaged parts on the vehicle, if it can be repaired, there is no need to replace it, if there is significant damage, replace the part according to the vehicle
